Note2Quiz: Hackathon Pitch Script (Harness Engineering)

Language: Hinglish | Duration: 3 Mins | Multimodal Verification Harness (MVH) Edition

1. Opening & Hook (0:00 - 0:30)

Stage Direction: Stage par aakar audience aur judges ki taraf smile ke saath shuru karein.

"Hello everyone and respected judges!

Ek honest sawaal: Hum sabne kabhi na kabhi exams se pehle 50-100 pages ke handwritten notes banaye hain ya doston se photos li hain, right?

Par problem yeh hoti hai ki sirf notes ko baar-baar passively read karne se retention nahi hoti. Neuroscience kehti hai ki sabse best learning technique hoti hai 'Active Recall' - yaani khud ko test karna.

Par kisi ke paas itna time nahi hota ki har chapter ke baad khud ke liye practice questions banaye.

Iss problem ko solve karne ke liye humne banaya hai: Note2Quiz - An AI-powered study assistant jo handwritten notes, diagrams aur formulas ko seconds mein verified practice tests aur study worksheets mein convert karta hai!"

2. Live Demo & Input Flexibility (0:30 - 1:20)

Stage Direction: Screen par web app dikhayein (http://localhost:3000) aur sample note load karein.

"[Screen point karte hue] Aap dekh sakte hain yeh hamara clean, engineering-first interface hai.

Yahan aap notes drag-and-drop kar sakte hain, ya seedha Ctrl + V press karke screenshot paste kar sakte hain.

Demo ke liye humne 1-Click Samples bhi diye hain: Biology, Calculus, aur Computer Science.

[Sample button 'Biology: DNA Replication' par click karein]

Dekhiye! Handwritten diagram load ho gaya. Ab hum difficulty select karenge aur hit karenge 'Generate Practice Quiz'!"

3. The Star Feature: Multimodal Verification Harness (1:20 - 2:10)

Stage Direction: Quiz load hote hi 'Harness Verified [Inspect]' badge par click karke Report Modal dikhayein.

"[Inspect button par click karein] Aur yahan aata hai hamara core engineering differentiator: The Multimodal Verification Harness!

Industry mein kehte hain: 'Agent = Model + Harness'. Hum sirf raw AI output par rely nahi karte. Hamara custom verification harness 4 automated evaluation gates run karta hai:

1. Cross-Modal Grounding: Visual entities check hoti hain taaki 0% hallucination ho. Grounding confidence score 98.2%!

2. Deterministic Schema Linter: 25/25 assertions pass hue hain - strictly 4 distinct options aur exact answer mapping.

3. Distractor Plausibility: Check karta hai ki options trivial ya circular na ho.

4. Bloom's Taxonomy Cognitive Distribution: Ensure karta hai ki questions sirf basic recall na ho, balki analytical reasoning aur application depth ho!

Har question ke upar visual grounding badge aur Bloom's level chip student ko complete trust deta hai."

4. Interactive Testing, Flashcards & PDF Export (2:10 - 2:45)

Stage Direction: Submit click karein, Flashcard flip dikhayein, aur 'Download PDF' click karein.

"Student timer ke saath quiz solve karta hai. Submit karte hi milta hai instant accuracy score aur comprehensive explanations.

Dual Study Mode: Jo log spaced repetition se revise karna chahte hain, unke liye 3D Flip Flashcards hain.

1-Click PDF Worksheet: [Download PDF par click karein] Aur 'Download PDF' dabate hi ek high-quality printable worksheet download ho jaati hai with verified answer key aur harness certificate!"

5. Tech Stack & Strong Closing (2:45 - 3:00)

Stage Direction: Confident eye contact ke saath conclude karein.

"Tech stack: Next.js 16 App Router, Tailwind CSS, Google GenAI Multimodal SDK, aur Server-Side API architecture with Zero Frontend Key exposure.

Note2Quiz is not just another wrapper - it's a verifiable, harness-engineered multimodal learning pipeline.

Thank you! We are excited to take your questions."

Ø=Ü¡ Hackathon Winning Pitch Tip:

• 'Inspect Ø=Þáþ ' button par zaroor click karein: Judges evaluation harness dekhkar impressed engineering show karta hai, na ki sirf prompt wrapper.

• Mention 'Agent = Model + Harness': Yeh phrase judges ko bataata hai ki aap modern AI engineering best practices samajhte hain.
